TURBO/COMBI

TURBO 47 COMBI

Turbo 47 Combi Stiga

A straightforward lawnmower with collector. The versatile lawnmower is working as three machines in one.

The lawnmower is excellent when a very effective collection is important. The model can also supply other needs. When you need to work through really high grass you just drive without the collector. Easily insert a plug and the lawnmower can also be driven in Multiclip mode. Then you don't have to rake or empty grass. Mowing is quieter and you fertilise the grass at the same time.

The cutting deck is galvanized which gives a better protection against rust. Cutting width is 46 cm.

The standard is very high regarding performance and environment friendly features.

Equipped with an environment friendly 4 hp motor.
